## Dual Pump In-tank Retrofit Fuel Pump Kit

#40020 - Hy-Fuel Dual Pump In-tank Retrofit Pump Kit

**FiTech Fuel Injection** now offers the Hyperfuel™ Hy-Fuel Dual Pump In-Tank Retrofit Kit. You can experience the advantage of a high-volume fuel system with the pumps inside the fuel tank. This kit is made to be fitted into an existing or aftermarket gas tank as well as a fuel cell with ease. It features dual 340 L/PH pumps that are capable of up to 1600 naturally aspirated horsepower as well as depth adjustable for tanks from 6 to 14 inches. This is the easiest way to convert your fuel tank to an in-tank EFI fuel system.

### A List of features of the Hy-Fuel Dual Pump In-Tank Retrofit Kit

- Installs in almost any tank with a depth of 6-inches to 14-inches to fit nearly any popular application.
- Low profile design for maximum clearance from bottom of the floor pan of vehicle.
- Billet aluminum construction with precision machined components.
- 35 square inch filter sock.
- Unique O-ring 360° mounting flange permits easy removal for servicing and re-use. Flange incorporates -06 AN fittings.
- Dual High quality 340 L/PH fuel pump for engines up to 1600 HP.
- Compatible with E-85 gasoline and alcohol or methanol based fuels.
- Capable of running pumps individual or simultaneously according to application.
